

Keeping you in-the-loop.

How to use the

envelop

The Envelop is a plastic-free courier bag that's strong and durable. Your customers will love it because it's 100% home compostable and can be sent back to the earth after use.

GETTING THE ENVELOOP READY FOR ITS JOURNEY:

Step 1:

Open the paper fly bag completely. Unfold the bottom so it can stand upright on its own.

Step 2:

Place your item for delivery in the bag.

Step 3:

Peel off the glue-strip on the flap.

Step 4:

Fold over the flap and press down tightly to seal the bag.

Step 5:

Place the waybill on the big blank space on the back of the bag and the Envelop is ready to roll!

HERE'S HOW TO ENSURE THE ENVELOOP DELIVERS EVERY TIME:

Do

- Use the Envelop to deliver items that fit. For example: shoe boxes; clothing; books; CDs; dog treats; headphones & boardgames
- Use soft cushioning inside the bag for fragile items
- Keep the bag as dry as possible
- Place the waybill on the big blank space on the back of the bag
- Make sure the writing at the back is as clear and legible as possible

Don't

- Pack any sharp objects inside
- Pack any items heavier than 5kg
- Pack any items that can't fit inside
- Cover the writing on the back
- Roll the bag up

How to send the Envelop back to the earth:

- Remove the waybill and any plastic tape
- Tear into strips and throw into your compost heap or general waste bin
- Let nature do the rest
- The Envelop is made from wet strength paper. Find out more at www.envelop.co.za

That's the inside scoop on the Envelop. Thanks for helping us keep plastic out of the environment and for contributing to a sustainable circular economy that benefits businesses.
